# About this resource

This report is a companion document to the report 'Home and dry: the need for decent homes in later life' which provides analysis and commentary about housing conditions in England in the context of population ageing.

This reference document provides more detailed data and tables from the specially commissioned analysis of the latest English Housing Survey (EHS) data that underpinned the main report. Unless otherwise stated, the data presented here is taken from the 2017 EHS survey.

**It also draws on past English Housing Survey<sup>1</sup> information including:**

- Published EHS Headline Reports (annual).
- Published EHS special subject reports.
- Published EHS live tables and datasets.

Non-decent homes regional distribution	22
Reasons why homes are non-decent	24
Cold homes	25

## Part 1

# Where do people live as they age?

The vast majority of people will live all, or nearly all, of their lives in ordinary housing that was not built specifically for a particular age group. 96% of today's over 55 years old households live in mainstream homes (Garret and Burris, 2015)<sup>2</sup> and 80% of the homes that people will be living in by 2050 are already built (Boardman et al, 2005).<sup>3</sup>

Of an estimated 23.5 million households in England, 46% have a household reference person<sup>4</sup> (HRP) of 55 years or older.

People of all ages live in a diverse range of housing types, including terraced houses, flats, semi-detached and detached properties, and tenures, owner occupied, social rented, private rented. The following tables provide analysis of these housing occupancy patterns with reference to four age bands of the HRP: under 55; 55 to 64 years; 65 to 74 years; 75 years and over.

<sup>2</sup> Garret H and Burris S (2015) Homes and ageing in England BRE Bracknell IHS BRE Press

<sup>3</sup> Boardman, B et al (2005) 40% House Environmental Change Institute. Available online at: <https://www.eci.ox.ac.uk/research/energy/downloads/40house/40house.pdf>

<sup>4</sup> The household reference person as defined by the English Housing Survey as the person in whose name the dwelling is owned or rented or who is otherwise responsible for the accommodation. In this report, we will also refer to this person as the head of the household.

## Housing stock typology

The most common dwelling type is the terraced house (28%), closely followed by semi-detached houses (26%). Flats of all types (converted/ purpose built low rise and high rise) are the next most common (20.5%) followed by detached houses (17%). Bungalows the least common (9%).

Households headed by someone aged 55 and over are more likely than other age groups to be living bungalows (15% vs 3%) and detached houses (22% vs 13%). They are less likely to be occupying small terraced houses (6% vs 13%) or purpose built low rise flats (12% vs 18%). Occupancy of semi-detached homes is only slightly higher for older age groups compared to younger ones (27% vs 24%).

**Table 1: Percentage within type of dwelling by age of household reference person (English Housing Survey 2017-2018)**

	Dwelling age								Total
	Small terraced house	Medium/large terraced house	Semi-detached house	Detached house	Bungalow	Converted flat	Purpose built flat, low rise	Purpose built flat, high rise	
Under 55 years old	12.7%	21.7%	24.4%	12.5%	3.2%	5.4%	18.1%	2.1%	100%
55 years old and over	5.8%	15.6%	27.2%	21.5%	15.1%	2%	11.8%	1.1%	100%
<b>Total</b>	<b>9.4%</b>	<b>18.8%</b>	<b>25.7%</b>	<b>16.8%</b>	<b>8.9%</b>	<b>3.8%</b>	<b>15.1%</b>	<b>1.6%</b>	<b>100%</b>

## Age of the housing stock

Over half (56%) of the English housing stock was built before 1965, with more than a third (37%) built before the end of World War 2.

Homes built between 1945-1980 are the most likely to be headed by people aged 55 and over (45% vs 33%). This group are less likely than younger age groups to be living in a pre-1919 property (17% vs 24%) or in a modern post 1990 home (12% vs 20%).

**Table 2: Age of dwelling by age of household reference person**

	Dwelling age						Total
	Pre 1919	1919 to 1944	1945 to 1964	1965 to 1980	1981 to 1990	Post 1990	
Under 55 years old	24.1%	15.8%	17.3%	16.0%	6.6%	20.1%	100%
55 years old and over	16.9%	17.0%	21.1%	24.0%	9.0%	12.0%	100%
<b>Total</b>	<b>20.7%</b>	<b>16.4%</b>	<b>19.2%</b>	<b>19.8%</b>	<b>7.8%</b>	<b>16.2%</b>	<b>100%</b>

## Housing Tenure

The majority (64%) of households (all ages) are owner occupied, a rate that has remained unchanged for the past five years following a decline from the peak of 71% in 2003. Private rented is now the second highest tenure (19%) and social rented third (17%).

The rate of home ownership increases for households headed by someone aged 55 and over (77%). 16% of this age group live in social rented housing and 7% in the private rented sector.

**Trends in tenure, 1918 to 2017-18**

Ministry of Housing, Communities & Local Government (2019) English Housing Survey data on tenure trends and cross tenure analysis. Table FT1101 (S101). Available to download at: <https://www.gov.uk/government/statistical-data-sets/tenure-trends-and-cross-tenure-analysis>

## Part 2

# Non-decent homes

Of the estimated 23.2 million households in England, 4.3 million (19%) are living in a non-decent home. Just under half of these non-decent homes are occupied by households that are headed by someone over the age of 55 (47%).

Non-decent homes occur in all types and ages of dwellings but certain groups of people are more likely to live in a poor quality home, with variations visible by age, disability and income. For some groups the situation has worsened, with for example, the number of non-decent homes headed by someone aged 75 years old and over increasing by 31% from 533,000 in 2012 to 701,000 in 2017.

## Non-decent homes by age and other householder characteristics

**Table 3: Number of non-decent households by age of HRP (Thousands, EHS data 2007, 2012, 2017)**

Age HRP	2007	2012	2017
Under 55 years	3,982	2,733	2,268
55-64 years	1,370	815	738
65-74 years	975	652	574
75 years or over	963	533	701
<b>All ages</b>	<b>7,290</b>	<b>4,734</b>	<b>4,281</b>

**Table 4: Percentage of non-decent homes by age of HRP and disability (EHS 2017)**

		Age of HRP			
		Under 55 years	55-64 years	65-74 years	75 years or over
Household member with long term illness or disability	Yes	25.9%	32.0%	46.1%	51.2%
	No	74.1%	68.0%	53.9%	48.8%
<b>Total</b>		<b>100%</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>

**Table 5: Percentage of household types that live in a non-decent home (single vs multi-person household) (EHS 2017)**

Household	Age of HRP				
	Under 55 years	55-64 years	65-74 years	75 years or over	All ages
Multi-person household in non-decent home	17.7%	15.6%	15.1%	20.7%	<b>17.3%</b>
Single person household in non-decent home	20.0%	26.2%	19.1%	21.9%	<b>21.5%</b>

**Table 6: Percentage of homes by age and household income (EHS 2017)**

Net annual income after housing costs - 5 bands		Under 55 years	55-64 years	65-74 years	75 years or over	All ages
		Less than £10,932	21.0%	24.1%	20.8%	29.0%
£10,932 - £17,479	20.5%	20.7%	23.7%	26.6%	<b>22.0%</b>
